Art Unit 1711

All previous rejections and/or objections are hereby expressly withdrawn.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Lee et al. (USP 5,571,869).

Lee et al. discloses a process in which polymer particles are grafted and in which the polymer particles may include those of polyvinyl chloride at column 2 line 16 and in which the grafting monomer may include 9 conjugated dienes such as 1,4 or 1,6-hexadiene at column 3 lines 16-19.

There are no specific examples in which Lee et al. uses polyvinyl chloride in combination with a non-conjugated diene such as 1,6-hexadiene. However it would have been obvious to a practitioner having ordinary skill in the art at the time of the invention to use such a combination in the expectation of adequate results absent any showing of surprising or unexpected results.

Art Unit 1711

The Examiner regrets the above new grounds of rejection, however it is noted that it only applies to claim 12.

Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 54-60 are allowed.

This Office action is not being made FINAL.
